

RTC Aero Engine Technician - H+S Aviation, Portsmouth

H+S Aviation – what do we do?

H+S Aviation and sister company, Dallas Airmotive, are OEM-certified and dedicated to providing maintenance, repair and overhaul services for small gas turbine and turbofan engines used in aviation.

Do you want a flexible working life where you can juggle your work and home life equally? Our flexi hour/day banking system will give you the control you need! We treat all our employees fairly, equitably and with respect, we like to look after our employees at H+S Aviation, we offer you our perks discount scheme for hundreds of retailers and wellbeing support for you and your family 24 hours a day. If you stay with us for 5 years or more, we have long service recognition plus many other benefits including a Company Pension scheme matching your contributions up to 7.5%, and a non-contractual share save bonus scheme to help save for a rainy day.

About the role:

Carry out Repairs, Rework and Refurbishments of aircraft engines and/or components in line with customer requirements and manufacturer specifications, ensuring the highest quality standards are achieved.

Based within the Portsmouth RTC must be willing to travel within the UK and Overseas on limited occasions to support the needs of the Business

- Check in and strip engines/components/products in line with engineering instructions
- Carry out basic cleaning of components as appropriate
- Inspect all relevant components and identify items for scrap, rework or refit with reference to and interpretation of relevant production information and Original Engine Manufacturer (OEM) manuals in accordance with Company Procedures and Quality Manual.
- Ensure all components for rebuilding are to required specifications and available within agreed turn time targets
- Rework Components, build engines, modules or components to defined standard ensuring fits & clearances and modification standards are accurate
- Prepare/set up unit for testing
- Carry out final checks on completed unit ensuring all paperwork is appropriately stamped
- As part of our continuing commitment to delight our customers we provide Out of Hours Emergency Cover. You may be required to help provide this service in an Out of Hours rota

What do we want to see from you?

- Recognised Engineering Apprenticeship
- Familiarisation with Gas Turbine Engines
- Preference given to candidates with a minimum of Line/Base Maintenance experience on PWC 500, PWC PT6A, PWC JT15D, or Honeywell TFE731 Series Turbine Engines
- Total quality principles, attention to detail and high level of concentration
- Valid Passport (minimum 6 months validity) for overseas travel
